

Wheels 4 Wheels

Thank you for joining *Wheels 4 Wheels*! You're helping make Tallinn more accessible for everyone.

Your Mission:

Ride a Bolt e-scooter around the city and use the StreetComplete app to collect key data for wheelchair accessibility. Your input will help map out safe and practical routes for wheelchair users.

What to Map:

Please focus on marking these parameters:

-  **Sidewalk existence** — Is there a sidewalk or not? On the left, right or both?
-  **Surface quality** — Is it paved, bumpy, or rough?
-  **Ramps** — Are there ramps? For wheelchairs, bikes, or strollers?
-  **Kerbs height** — Are there drop kerbs or high edges?
-  **Crossings** — Is there a crosswalk on the street? Does it have an island?

Where:

Map these five areas that will be distributed among you:

1. Kesklinn
2. Mustamäe
3. Haabersti (Rocca al Mare & Zoo area)
4. Pirita (Beach & Monastery area)
5. Ülemiste & Sikupilli subdistricts
6. Noblessner & Kalamaja

How to Do It:

1. Open StreetComplete.
2. Tap on the top right hamburger icon
3. Tap on "Settings"
4. Tap on "quest selection and priority"
5. Select the relevant Quests (see below)
6. Use your scooter to pretend as if you're in a wheelchair. If you're scooter has trouble at a slow speed on certain sidewalks, a wheelchair will have even more.
7. Check the quests one by one, do not group them.
8. Make sure to stop often. The scooters need some time to process the data they're collecting.

Quests:

-  ~~Is there a pavement along this street?~~
-  What's the surface here?
-  What's the surface quality here?
-  Do these steps have a ramp? What kind?
-  What's the height of this curb?
-  Is there a crossing here?

What's the height of the kerbs at this crossing?

Tips:

- Always ride on the sidewalk, this is the relevant area for a wheelchair.
- Answer consciously and carefully; this information affects thousands of people.
- Tap on the Quest you're solving to activate it.
- Try to wear a helmet for protection.
- Always park the e-scooter safely and legally.
- Be aware of your surroundings and traffic.

Communication:

We will create a WhatsApp group where you can easily chat with us should you have any requests or questions. Please mute it to avoid seeing all notifications, and only use the chat when necessary.

You're mapping freedom of movement. Thank you for helping build a more inclusive city!
